### 1.2 Purpose

The purpose of the **Release Notes** document is to communicate major new features and changes in this release of the THINC-API for Grinder libraries. It also documents known problems and workarounds.

### 1.3 Scope

This document describes Public Release 1.26.2.0 of THINC-API

### 1.4 Definitions, Acronyms, and Abbreviations

GAC – Global Assembly Cache Windows folder

### 1.5 References

None.

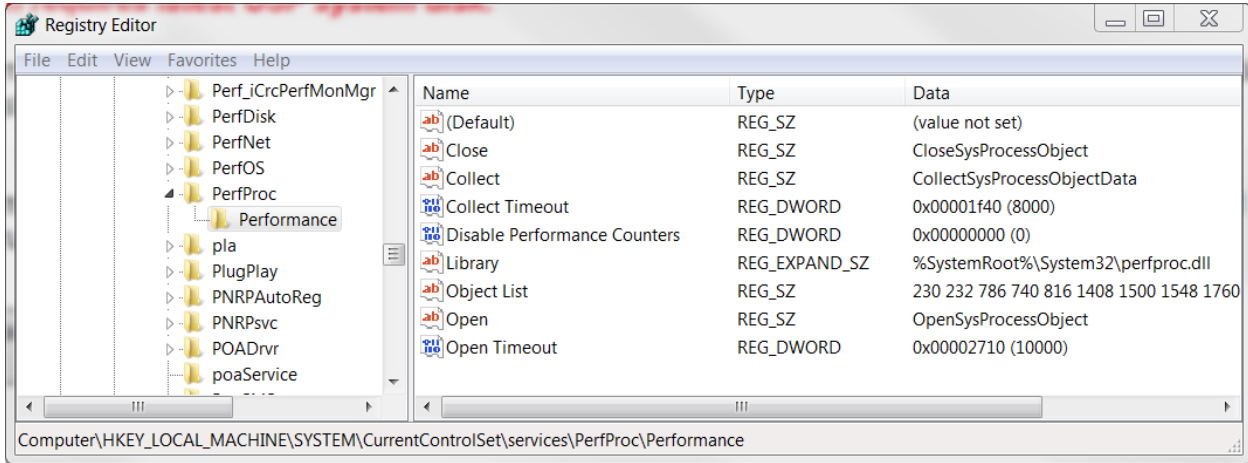

## 2. About This Release

Public Release of the THINC-API library for Grinder supports the following:

From this release and forward, THINC API libraries will check dependency libraries during installation. THINC API will fail to install if version of dependency OCJ libraries cannot support current version of THINC API.

From this release and forward, API Notifier will delay the checking of API for an approximately of 1 minutes or so after NC is running. API Notifier service does use Windows Performance Counters service. As a result, API Notifier will not run correctly if Windows Performance Counters service is not enable. During the installation of THINC-API, Windows Performance Counters will be reset to 0 in the Windows system registry as shown below:

From this release and forward, THINC-API libraries can support either legacy license file name, okuma.api.lic or new OAC license file named okuma.api.xml. Only new OAC license file can support alphanumeric machine serial number. If both license files existing in the license folder, only OAC license file named okuma.api.xml is used to check for valid license.

*The API Notifier status displayed in the system tray on the previous OSP-P controls such as P300/200/100II can be also checked by clicking on the shortcut of API Notifier on OSP-P500 VKEY*

Libraries included in this release for Grinder are compiled with .NET Framework 4.0:

Version of Okuma.CGDATAPI.dll in this release is 1.4.0.0

Version of Okuma.CGCMDDAPI.dll in this release is 1.3.0.0

Version of APINotifierService.exe in this release is 1.26.2.0

Version of APINotifierStatus.exe in this release is 1.4.0.0

Version of Okuma.Flexnet.Net4.dll in this release is 1.0.0.0

Version of Okuma.Apilog2.dll in this release is 1.2.0.0

This release requires OCJ custom API version 002 on target machine. THINC-API will verify the existing of OCJ custom API version before performing the installation.

The PLC system package listed in the table per control type is also required.

OSP	PLCS package
P300	PLCS300A or higher

**Starting from the public release, version 1.24.0.0, all previous versions of THINC-API installed on machine must be first un-installed before installing newer versions.**

### 3. Features

None.

### 4. Known Bugs and Limitations

This section identifies known and existing problems in this release and describes any work-arounds.

#### 4.1 Defect

None.
